

GROUP MINGO THINGS

Empowering your Connected Cities

At MTi, we are at the forefront of consulting, technology, and management services, helping businesses to expand around the world.

With long-standing experience in engineering, consulting, and implementing IoT solutions across various industries, we collaborate with thethings.io, a leading IoT platform, to deliver seamless and scalable solutions tailored for any business.

Our Core Expertise

MTi provides end-to-end IoT integration services, from initial consultation to ongoing support, guiding you through every step of your digital transformation journey. We prioritize sustainability, efficiency, and continuous improvement, ensuring our clients receive best-in-class IoT solutions tailored to their needs.

- **Consulting:** Understand your specific needs and objectives.
- **Solution Design:** Develop a custom solution based on your industrial requirements.
- **System Integration:** Select and deploy the appropriate sensors, devices, and systems.
- **Support:** Provide ongoing assistance to ensure optimal performance.

Some of our solutions ...

Industry 4.0

Challenges

Unplanned downtime, high energy costs, and inefficient production impact your industrial performance?

Innovations

Industry 4.0 IoT solutions predict failures, reduce downtime, and extend machinery lifespan. Automate production and optimize energy use for sustainability. Streamline the supply chain with smarter inventory management.

Resolution

Boost efficiency, lower costs, and gain control with real-time monitoring and remote management of your assets.

Smart Cities

- Energy Efficiency
- City Resources Optimization
- Real-Time Monitoring & Control
- Infrastructure Maintenance
- Smart Urban Services

Challenges

Urban areas face rising maintenance costs, inefficient resource use, and service delays?

Innovations

Smart city IoT solutions predict infrastructure issues, automate services, and optimize energy consumption. Improve waste management, traffic flow, and public safety with real-time monitoring.

Resolution

Enhance efficiency, reduce costs, and improve quality of life with smarter urban management and remote control capabilities.

Smart Buildings

- Infrastructure Maintenance
- Energy Efficiency
- Smart Urban Services
- City Resources Optimization
- Real-Time Monitoring & Control

Innovations

Smart building IoT solutions predict equipment failures, automate management, and optimize energy use. Enhance security, comfort, and efficiency with real-time monitoring.

Challenges

Buildings struggle with high energy costs, maintenance issues, and inefficient resource management?

Resolution

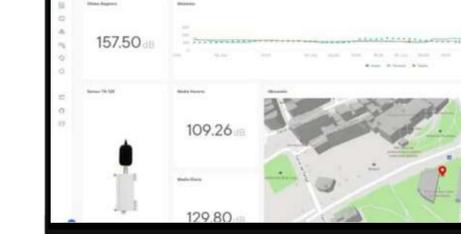

Lower costs, increase sustainability, and improve occupant experience through smarter building operations and remote control.

Real-Time Data Monitoring with thethings.io

Thethings.io platform provides real-time alerts and customizable dashboards to help businesses monitor and manage industrial operations, enhancing decision-making and operational efficiency.

- **Predictive Maintenance**
Uses IoT and AI to anticipate equipment failures, reducing downtime and extending lifespan.
- **Production Monitoring**
Tracks metrics in real-time for better throughput and quality control.
- **Asset Tracking**
Provides IoT-powered visibility and control over resources.
- **Energy Management**
Monitors usage to cut costs and boost sustainability.
